Choice Cattleya Orchid Plants

The seedlings herewith listed comprise a group of crosses that we believe will assure you of having plants in bloom throughout the year. We are in a position to assure you of the outstanding quality of these hardy plants. These, and all our crosses are propagated from our own pedigreed stock. No crosses are ever made promiscuously. Each parent plant is selected to produce seedlings that will meet the exacting requirements of the amateur and commercial orchid connoisseur of tomorrow.

The Cattleya Trianae plants used in these hybrids were collected by Mr. Rapella in Colombia, South America. They were selected to create seedlings of unusual vigor from jungle stock, originally containing an abundance of this rich vigor.

No.		1½-in.	2-in.
308	Peetersii x C. Trianae (Grand Monarch) Sept. to Jan.	\$.50	\$1.00
312	C. Trianae (alba) x Trianae (alba) Nov. to Mar.	.50	1.00
